NARRATIVE

On 08-19-2026, I was notified that a road department employee located a Flock Gunshot detector vandalized on Main Street near the Post Office. The following is a summary of what occurred.

I went to the location and found the Flock Gunshot Detector broken into multiple pieces at the entryway of Frontage Road in front of the Post Office. Using my department-issued iPhone, I photographed the pieces in the roadway and collected them for disposal. I later uploaded the photographs to evidence.com

I contacted the Road Department Manager (Patrick Vargas), and he stated that one of his employees observed that the mounting pole for the Flock Gun Shot Detector was bent over, obstructing the bike lane on Main Street. The pole was on the sidewalk area between South Frontage Road and Main Street just north of Blazing Shears. Patrick advised the employee to photograph the damaged pole and remove the hazard from the bike lane. Patrick later emailed me the photographs, and I uploaded the photographs to Evidence.com

Officer Leach reached out to our Flock representative to determine the value of the Flock camera and to determine when the camera was damaged. See Officer Leach's supplemental report for additional details.

Officer Leach and I located video surveillance footage from the nearby Main Street Promenade. The surveillance video showed two males approximately 20 to 35 years old approaching the Flock Gunshot Detector. One of the males jumped on the pole, then began pulling on the mounting pole and bent it toward Main Street. The video then stops because the surveillance camera is only activated by motion. The video begins approximately thirty seconds later when an Eastern Sierra Transit Association (ESTA) trolley drives by on Main Street. The trolley appears to stop and pick up passengers at a nearby bus stop. See Officer Leach's supplemental report for additional details.

I requested video surveillance footage from the ESTA trolley.

Case Status: Pending review of the security camera footage from the ESTA trolley.

SUPPLEMENT 1 - Surveillance Footage

On 08/19/2026 at approximately 0820 hours, I responded to the area of Main Street near the Mammoth Post Office to meet with Officer West and Officer Wang regarding a vandalized FLOCK gunshot detection device.

Upon arrival, Officer West and Officer Wang collected pieces of the damaged device from the roadway and located the post hole where the FLOCK pole had been installed. The pole had been affixed across the street on South Frontage Road near the crosswalk in front of Blazing Sheers, located at approximately 37.647896, - 118.971308.

I returned to the Mammoth Lakes Police Department and contacted [REDACTED] with FLOCK Safety by telephone and email. [REDACTED] instructed me to send an email to investigation-intake@flocksafety.com and complete an investigative contact form.

On 08/19/2026 at approximately 1313 hours, I received an email from FLOCK Safety providing information regarding the device's activity prior to the incident.

Officer Leach,

The last benign recording from the device was on August 18 at 9:16 PM. It sounds like environmental noise and does not appear to contain anything of value. The last heartbeat (including the GPS ping and the device's self-diagnostic check) occurred at 8:53 PM. Based on this, I would estimate the time of the incident to be shortly after or right around 9:16 PM.

The email from FLOCK also contained a sound recording associated with the incident. I later uploaded the recording to this case as evidence.

Officer Wang and I contacted several businesses in the area in an attempt to locate surveillance footage of the incident. We contacted the building manager for Main Street Promenade, located at 3343 Main Street, and reviewed the available surveillance footage. Surveillance cameras positioned in front of Sun and Ski Sports captured the incident.

Officer Wang collected the surveillance footage, and I later uploaded two video files to Evidence.com for evidence retention.

Upon reviewing the footage, on 08/18/2026 at approximately 2117 hours, three males are observed walking from the Mammoth Post Office toward Main Street. Two of the males walk out of the camera's view westbound towards the bus stop, while the third male continues eastbound on North Frontage Road toward NAPA Auto Parts.

At approximately 2118 hours, a light skinned male adult is observed running across Main Street directly toward the FLOCK pole on South Frontage Road. The male jumps onto the pole and appears to attempt to remove the gunshot detection device from the pole. The male returns to the ground, bends the pole over into Main Street, and appears to remove the gunshot detection device. He then throws the device in the direction of the

SUPPLEMENT 1 - Surveillance Footage

Mammoth Post Office. The male is wearing a dark-colored, short-sleeved shirt and what appears to be jeans.

At approximately the same time the first male climbs the FLOCK pole, a second male is observed running across Main Street towards South Frontage Road wearing a dark colored shirt and light colored pants. The third male, who had previously been walking eastbound on North Frontage Road, is later observed walking westbound on North Frontage Road and stops at the intersection of Main Street and the Post Office. The third male does not appear to participate in the destruction or removal of the FLOCK device and observes.

The surveillance camera is motion-activated and does not continuously record. At approximately 2118:29 hours, the video pauses and resumes at approximately 2118:56 hours. When the video resumes, a red Town Trolley is observed pulling into the westbound bus stop in front of the Mammoth Post Office and appears to possibly pick up passengers. The camera's view was obstructed by a wooden pillar, limiting visibility of the area. Eastern Sierra Transit Authority (ESTA) was contacted to determine whether interior trolley surveillance footage was available showing passengers entering the bus at the specified time and location. As of now, ESTA has not sent any surveillance footage.

Officer Wang and I contacted additional nearby businesses, including NAPA Auto Parts, Chevron, Shell (Center Street), Schat's Bakery, and Blazing Shears, in an attempt to locate additional surveillance footage capturing the incident. None of the businesses contacted were able to provide surveillance footage depicting the incident.

I also contacted FLOCK Safety Support via email to request replacement of the vandalized gunshot detection device and pole. FLOCK Safety confirmed receipt of my request and opened a work order under case number 01986203. I also requested a quote for the estimated replacement cost for the vandalized equipment. FLOCK Safety provided the following:

- Gunshot Detection Device Replacement- \$800
- Flock Pole Replacement - \$500
- Solar Panel Replacement - \$350

Case Status: Pending video from ESTA

SUPPLEMENT 2 - ESTA Footage

On 08-21-2026, I received an email from the Easter Sierra Transit Association (ESTA) Operations Manager (Brian Ognisty) containing links to the security camera footage from the trolley that stopped at Bus Stop # 13 on Main Street approximately thirty seconds after the vandalism of the Flock gunshot detector occurred. Based on the video surveillance footage obtained from the Main Street Promenade, it was possible that the suspects boarded the trolley and left the area. The following is a summary of what occurred.

I reviewed the trolley camera footage. The video is time-stamped for 08-18-2026 at 2118 hours. The video is in a tile format with multiple cameras covering the interior and exterior of the trolley. The video shows two juvenile males board the trolley as it stops at the #13 bus stop. The first male appears to be a white male juvenile with blond hair wearing a dark colored t-shirt and blue jeans. The second male appears to be a white male juvenile with blond hair wearing a dark colored baseball hat, a dark-colored shirt, and blue jeans. The appearance of the two juveniles is consistent with the two individuals who vandalized the Flock gunshot detector approximately one minute prior. The two juveniles walked to the back of the trolley and sat down in the back row. The video then ends. The videos were uploaded to evidence.com.

I reached out to ESTA and requested video footage from the time the two juveniles entered the trolley to when they exited. I also requested the individual videos from the camera pointed to the entrance of the trolley. The larger video will allow me a better chance to identify the juveniles.

Case Status: Inactive Pending Leads. Pending additional videos from ESTA. Pending identification of the two juvenile suspects.
