CONTROLLED DOCUMENT

On 08-21-2026, Chief Casabian advised that the Flock Gun Shot Detector in the parking lot at the south side of the Mammoth Lakes Pickleball Complex had been vandalized. The following is a summary of what occurred.

At approximately 1115 hours, I arrived at the location. Observed that the counting pole was bent to the ground, the solar panel glass was shattered, and the gunshot detecting device was missing. I attempted to locate the gunshot detection device in the surrounding area but was unsuccessful.

I checked the area for security cameras that would have witnessed the incident but was unable to locate any. I emailed Officer Leach requesting that she reach out to our Flock representative to determine when the gunshot detector went offline.

Case Status: Inactive Pending Leads. Pending reply from Flock on when the detector went offline.

SUPPLEMENT 1

On 08/24/2026 at approximately 0743 hours, I emailed investigation-intake@flocksafety.com and our FLOCK Safety Account Executive, [REDACTED], regarding the FLOCK gunshot detector that had been vandalized behind the Pickleball Courts in Mammoth Lakes. The approximate GPS coordinates of the device were 37.638784, - 118.962164.

At approximately 1120 hours, I received an email response from FLOCK Safety.

Hi Officer Leach,

Unfortunately, there is no data associated with this device as it was deactivated. Our team has since reactivated the site.

I recommend coordinating with [REDACTED], your Account Executive, to submit this to our support team for a work order and reinstallation. I apologize that I couldn't provide more data for your investigation.

At this time, the date and time the gunshot detector was vandalized are unknown. Due to the remote location of the device, no exterior surveillance cameras were identified that captured the incident.

I subsequently emailed support@flocksafety.com and engage@flocksafety.com to request replacement of the damaged equipment. FLOCK opened a case under 01986203.

Case Status: Pending leads.
