NARRATIVE

On 9-1-2026 at about 2030 hours, MLPD was notified of a possible damaged/missing Flock LPR camera at Meridian Boulevard and College Parkway. I later arrived on scene and noticed the LPR camera was missing from the pole and the cables from the camera to the solar panel had been cut. The pole and solar panel appeared undamaged. It was possible that the camera had been thrown into the thick brush in the area, but I was unable to locate the missing camera nearby. I was only able to locate a small piece of the hose clamp use to attach the camera to the pole in the dirt near the pole. I photographed the pole with missing camera. I was unable to locate anything of evidential value on scene or any surveillance cameras nearby.

I later emailed support@flocksafety.com and notified them of this damaged/missing Flock device. This Flock camera was owned by the Mammoth Unified School District. Based on Flock's current online fee schedule, the cost to replace the camera was \$800.

Case Status:

Inactive, no leads.

SUPPLEMENT 1

On 09/02/26 at approximately 0938 hours, I emailed Flock Safety at investigation-intake@flocksafety.com requesting information regarding the last recorded detection and/or the approximate time the LPR device went offline in an attempt to narrow down the timeframe in which the vandalism occurred.

On 09/02/26 at approximately 1156 hours, I received an email from [REDACTED] with FLOCK.

Hi Officer Leach,

There is no need to call me back, as I was able to find the information you requested.

The last GPS ping associated with this device was on August 9 at 1:51 PM, which was at the device's originally installed location. The last good image from the device before it went offline was captured on August 8 at 1:51 AM. Other metrics indicate that the device suffered an adverse event right around that time (1:51 AM).

Hopefully, this provides a good starting point for your timeline.

After receiving the email from [REDACTED], I contacted him by telephone for clarification. [REDACTED] stated the LPR camera was most likely destroyed while it was still mounted on the pole at the scene, as there was no subsequent GPS ping after the camera went offline. [REDACTED] advised the last license plate captured by the camera was on 08/08/2026 at approximately 0151 hours. The plate was [REDACTED], which was associated with a white Honda HR-V.

Case Status: Inactive, no leads.
