[EXTERNAL EMAIL]

Thank you Christina and Stu.

As we just discussed in the department head meeting, I will just remove the first sentence and start the post with "Mammoth Lakes is raising the bar for community safety."

Thank you team!

Lara

Good Morning Lara,

Thank you! Please remove anything highlighted in yellow below. Also, team, what do you think of the 1st sentence "What the Flock" below? I am personally not a fan but want to see what Stu thinks.

As to address your concerns about the weather... These cameras are designed for extreme snow climates. They have large storage batteries to operate when solar can not be utilized. They are also

designed to not accumulate snow on the surfaces.

[EXTERNAL EMAIL]

Good morning,

Below please find an edited version of today's social post. Please let me know if you have any changes. Also, the incoming weather made me wonder how the cameras function during snowstorms? Do they still operate well? I was thinking we might want to add a line about that to make the post relevant to today's weather. Thank you, Lara

What the Flock? Mammoth Lakes is raising the bar for community safety.

While you may, or may not have noticed the small, solar-powered cameras popping up on local roadways, their appearances signal an advanced system being used to enhance the well-being of our town.

In August of 2024, the Mammoth Lakes Police Department installed 10 Flock Automated License Plate Reader (ALPR) cameras throughout town to:

- Locate vehicles that are stolen, involved in criminal activity, or wanted by law enforcement.
- Provide leads to assist with investigations into crimes committed within the Town.
- Detect vehicles associated with missing persons and at-risk persons, including those on active Amber Alerts, Feather Alerts, and Silver Alerts.
- Detect vehicles associated with subjects with outstanding arrest warrants or otherwise lawfully sought by law enforcement.
- Capture real-time vehicle count data to assist in evacuation planning.

Recently, the MLPD partnered with the Mammoth Unified School District, Mono County Office of Education, Cerro Coso Community College, and Mammoth Hospital to expand its Flock Safety ALPR camera coverage. This includes the purchase of three additional ALPR Falcon cameras, plus Raven gunshot detectors that cover a ¼ square mile when installed. These additions to the local Flock system will create a virtual perimeter around our community's schools and hospital.

Flock Safety Cameras do not provide any facial recognition or personally identifiable information, and the cameras are not used for automated traffic or immigration enforcement. All data from the cameras automatically deletes after 30 days.

More information about Flock Safety, including a link to our transparency portal, can be found at:

Good Morning Laura,

We went out this morning and got some pictures of the cameras for you. I also have some stock product photos from Flock if you want those.

Here is the writeup, feel free to change as you see fit for the social media post. Thank you!

The Mammoth Lakes Police Department has partnered with the Mammoth Unified School District, Mono County Office of Education, Cerro Coso Community College, and Mammoth Hospital to expand its Flock Safety ALPR camera coverage in Town. This includes the purchase of 3 additional Falcon cameras in addition to Raven gunshot detectors that will cover a ¼ square mile. [EXTERNAL EMAIL]

Thank you, Christina! Ideally it would be great to have it by EOD Tuesday. Do you have photos of the cameras and detectors as well?

Thanks again,
Lara

Hello Lara,

Chief said I need to give you some more information about Flock for your social media post next week? I think mainly that we have partnered with MUSD, Mono County Office of Education, Cerro Coso, and the Hospital to get 3 Falcon cameras and Raven gunshot detectors that will cover a ¼ square mile. Please just let me know when you need it by and I'll get you a writeup.
