Mammoth Lakes Town Council
Agenda Action Sheet

Title: Receive a presentation from Mammoth Community Water District on the 2025 Urban Water Management Plan and 2026 Water Shortage Contingency Plan.

Council Meeting Date: 6/17/2026

Prepared by: Nolan Bobroff, Community & Economic Development Director

Recommended Motion: Informational item only. MCWD staff will be available for questions

Summary: Mammoth Community Water District (MCWD) will provide a presentation on the recently adopted 2025 Urban Water Management Plan (UWMP) and 2026 Water Shortage Contingency Plan (WSCP). The two documents were adopted by the MCWD Board on May 21, 2026, and will become effective on June 22, 2026.

- **Urban Water Management Plan (UWMP)**
  The purpose of the Urban Water Management Plan (UWMP) is to ensure water suppliers assess resources and plan for current and future water demands to avoid future emergency shortfalls of water supplies. Information is presented in five-year planning intervals for the next 20 years, through 2045, assessing the reliability of water sources, describing demand management measures, and discussing the current use and planned use of recycled water. The UWMP will serve as a guide for MCWD strategic planning to ensure long-term water supply reliability for the Town of Mammoth Lakes. The UWMP is required to be updated every five years.
- **Water Shortage Contingency Plan (WSCP)**
  The Water Shortage Contingency Plan (WCSP) is a required element of the UWMP and outlines actions to take during various levels of water shortage.

Documents
Draft Plans – MCWD is making minor edits to the final documents; No substantive changes to the final documents are being made
