TOWN OF MAMMOTH LAKES STAFF REPORT

Title: Trail System Master Plan Review – Chapter 4 and additional discussion items.

Meeting Date: 10/26/2026

Prepared by: Andrew Mulford

The Town of Mammoth Lakes adopted a Trail System Master Plan (TSMP) in 1991. In 2011 the town adopted an updated Trail System Master Plan, this is our current guiding document, and we will be conducting an update in the next 2-3 years. We would like for this group to review the current TSMP and provide input to help guide the creation of the updated document. This is an important step in guiding our program of work and priorities moving forward, both in the short and long terms.

- **For this meeting**, please review chapter 4 – Future Trail System Recommendations. (Pg 111-166).
    - Chapter 4 can be downloaded or read here: https://mltpa.org/images/downloads/060_4FutureTrailSysRecommendations.pdf
    - Full TSMP can be downloaded or ready here: https://www.ci.mammoth-lakes.ca.us/371/Trails-System-Master-Plan

- As you read, please keep an eye out for the following:
    - What items has the Town/Office of Outdoor Recreation (Trails Program) done very well?
    - What items have we neglected?
    - What elements of this document deserve more focus moving forward?
    - What elements of this document would be more appropriately assigned to a different department of the town?
    - What is missing from the current document? (This will be more easily answered as we get to the end of our review)
    - What elements of this current TSMP may be irrelevant in our current situation?
    - What are some areas of friction that may have kept us from making progress on key elements of the TSMP?
- Thank you for your input on this document and we very much look forward to our discussion.

- **For our next MTC meeting on 12/14** we will be sharing a Summer 2026 Trail Counter report and discussing the trail use data collection program. We look forward to your recommendations.
